FREEMAN WISDOM CHINAZAEKPERE

—

ABOUT ME

Freeman Chinazaekpere is a passionate frontend developer and aspiring software engineer, currently building his skills in Graphic Designing, HTML, CSS, and JavaScript through hands-on projects and continuous learning. Operating under his personal brand, *CodeCraft by Freeman*, he is dedicated to creating user-friendly and responsive web applications that solve real-world problems. Freeman's goal is to become a professional in the tech industry, specializing in frontend frameworks like React and contributing to impactful open-source projects. He recently completed a responsive e-commerce website as part of a self-directed challenge and has actively practiced public speaking by developing and delivering a compelling elevator pitch. His ability to learn quickly and his commitment to g. Freeman's goal is to become a professional in the tech industry, specializing in frontend frameworks like React and contributing to impactful open-source project's growth make him a strong emerging talent in the tech space.
